CONIFER CODING SERVICES FOR PHYSICIANS

Helping You:

- Maintain coding accuracy and prepare for changing regulatory and compliance requirements

- Improve revenue cycle efficiency and maximize reimbursement levels with fewer rejected and miscoded claims

- Enhance patient care and safety with the right level of granularity and specificity for correct diagnosis and treatment

- Improve operational effectiveness by auditing and rectifying areas of potential coding issues and risks

- Continually educate and train physician and clinical staff for improved coding performance and accurate clinical documentation

Improved Coding to Optimize Reimbursement and Quality of Care

Accurate coding for a more efficient revenue cycle with an enhanced level of patient care

YOUR BUSINESS CHALLENGE

Physicians are striving to improve coding and billing practices as government and regulations increase, become more complex and place value-based care at the forefront. Failure to stay ahead of these ever-changing requirements and a lack of specialty-specific expertise could lead to miscoded and rejected claims, reimbursement disruptions and a lower quality of patient care.

Greater coding accuracy, specificity and continuous education are essential to maintaining standards; and critical to the success of your ongoing operations.

WHAT WE OFFER

Conifer Health Solutions has provided healthcare organizations with specialized health information management (HIM) services for nearly three decades. Our American Health Information Management Association (AHIMA) and American Academy of Professional Coders (AAPC)-certified and approved consultants, have the multi-specialty experience and expertise to help any size physician practice successfully meet heightened coding guidelines from the business office to the emergency room.

We offer the industry's most comprehensive suite of coding and clinical documentation improvement services—ranging from coding audit outsourcing and planning, to specific chart audits and peer-to-peer clinical documentation training and education. With Conifer Health as your partner, you can be confident in your ability to process fewer claims and avoid costly mistakes.

Conifer Health helps organizations transition from volume to value-based care, enhance the patient experience and improve quality, cost and access to healthcare.

We deliver a phased approach to coding performance audits consisting of:

- An assessment of current coding quality to identify gaps, root cause, patterns and trends

- Customized ICD-10-CM/PCS education and training delivered by certified staff experts

- Validation of coding practices through random payer samples to identify areas of coding risk

- Thorough coding analysis with recommendations for improved coding quality and continuous coder and physician education

HOW WE'RE DIFFERENT

Unmatched expertise

Our HIM consultants and physicians have deep experience and industry-recognized credentials including: Registered Health Information Technician (RHIT), Registered Health Information Administrator (RHIA), Registered Nurse (RN) and Certified Coding Specialist (CCS).

Certified proficiency in complex coding

Our coding staff members are certified by organizations such as AAPC and AHIMA, and can provide coding for every major specialty, including those with complex coding requirements such as Radiology and Anesthesiology.

Deeply-rooted experience

For three decades, Conifer Health has helped our clients accelerate the revenue cycle and optimize profitability with greater code quality and accuracy. We provide coding services, clinical documentation improvement and support for physician practices, hospitals and academic medical centers across the United States.
