

CONIFERCORE®
CLINICAL INTEGRATION
INTELLIGENCE

Helping You:

- Monitor provider performance across a core set of quality measures
- Identify where there are systematic or individual opportunities to improve performance
- Present a quality performance scorecard to each network provider
- Receive a snap shot view of quality measures critical to individual pay-for-performance contracts
- Support compliance with regulatory requirements for a clinically integrated network

Achieve Enterprise Intelligence for the Integrated Care Team

Empowering every member of the care team to measure and improve performance

YOUR BUSINESS CHALLENGE

In addition to facilitating optimal care, healthcare organizations are tasked with measuring and enhancing clinical performance. The changes required for effective clinical integration can be a challenge for physicians and other members of the clinical care team to incorporate into their daily workflow. To tackle this challenge, healthcare organizations need state-of-the-art technology that puts accurate, real-time clinical information into the hands of clinicians — at the point of care.

WHAT WE OFFER

The ConiferCore® Clinical Integration Intelligence platform enables you to monitor performance against your quality goals through a powerful web-based portal, complete with customizable dashboards. The dashboard provides easy-to-understand views of information including physician compliance, patient detail, and clinical outcomes. Supported by industry-leading data aggregation and warehousing technology, the platform delivers the enterprise intelligence your clinical team needs to track and improve results at the physician, practice group and network levels.

ConiferCore® Clinical Integration Intelligence includes:

- A robust Clinical Measures Library of more than 200 metrics plus the ability to build additional custom measures, making it easy to measure clinical performance using national standards, including Joint Commission, the Centers for Medicare & Medicaid Services quality and outcome measures, Physician Quality Reporting System (PQRS), National Committee for Quality Assurance (NCQA), the Healthcare Effectiveness Data and Information Set, National Quality Forum algorithms and more

Conifer Health helps organizations transition from volume to value-based care, enhance the patient experience and improve quality, cost and access to healthcare.

- A single view of a physician's performance analyzed and standardized from multiple healthcare data sources
- An instant display of performance on quality measures by specialty down to the individual physician
- Target and benchmark data for quality performance of similar specialties at the group and individual physician level – engaging providers to improve performance
- A multi-tabbed dashboard view customizable to specific payer programs such as Medicare Shared Savings Plan ACOs or commercial pay-for-performance contracts
- Administrative and management reports displaying centralized and physician level comparative reports to track patterns in utilization and outcomes
- Consulting on metric selection, if not already selected by your network

HOW WE'RE DIFFERENT

Web-based physician portal

Our web-based physician portal provides instant access to track quality metrics by specialty or down to the individual physician, aggregating data from multiple healthcare data sources.

Administrative and management dashboard

Our administrative and management dashboard displays aggregated and physician-level comparative reports, including trend data and summary reports, to track practice patterns.

Quality measures dashboard

Our quality measures dashboard includes provider report cards, benchmarking and compliance performance metrics based on analysis of patient encounter, laboratory and pharmacy data. It is a powerful tool for identifying gaps in care.
