

CONIFER CLINICAL  
DOCUMENTATION  
IMPROVEMENT (CDI)  
FOR PHYSICIANS

**Helping You:**

- Audit and analyze clinical documentation specificity to support accurate medical code assignment
- Educate physicians through customized and ongoing peer-to-peer training
- Improve physician-clinician engagement across the care continuum
- Prevent denials and improve reimbursements from insurers and other payers
- Identify potential compliance risks and operational improvements
- Stay up-to-date with regulatory changes, avoiding costly penalties for non-compliance

## Physician Education for Accurate and Quality-Driven Clinical Documentation

Providing comprehensive peer-to-peer clinical documentation education and training for improved financial performance and enhanced patient care

### **YOUR BUSINESS CHALLENGE**

Clinical documentation impacts quality of care and the financial health of the revenue cycle. Regulatory mandates already require increased clinical specificity and granularity in documentation and coding for healthcare organizations. A lack of specificity on a patient record can affect patient quality and safety and can also affect payments, causing denials and decreased reimbursement.

Physicians would agree that accurate and high-quality data is key to ensuring patient diagnosis and health data correspond to the delivery of care. Collaboration between physicians and clinical staff leads to a more accurate diagnosis and treatment plan across the care continuum. Today, accurate documentation, coding and appropriate physician-clinician collaboration are required to positively impact financial performance, patient care, and compliance adoption and reporting.

### **WHAT WE OFFER**

Clinical documentation is at the core of every patient encounter. Conifer Clinical Documentation Improvement helps physicians ensure that documentation is accurate, complete and clearly reflects the scope of services provided to the patient. With ongoing physician education and peer-to-peer training, our solution helps improve patient outcomes, enhance financial performance and streamline operations and compliance efforts. Physicians can focus on what they do best — caring for patients.

Conifer Health helps organizations transition from volume to value-based care, enhance the patient experience and improve quality, cost and access to healthcare.

## **CONIFER** HEALTH SOLUTIONS®

**Hospitals & Health Systems**

Our customizable program includes::

- Peer-to-peer education on medical specificity needed for coding accuracy
- Thorough review of patient medical records to help ensure complete and specific documentation
- On-site physician education on findings from medical documentation reviews
- Ongoing education on procedures to support the heightened documentation and reporting requirements associated with ICD-10 and MACRA
- Comprehensive training for physicians delivered by our Health Information Management (HIM) consultants and Conifer Health-dedicated physicians

### **HOW WE'RE DIFFERENT**

#### **Unmatched expertise**

Our HIM consultants and physicians have deep experience and industry-recognized credentials including: Registered Health Information Technician (RHIT), Registered Health Information Administrator (RHIA), Registered Nurse (RN) and Certified Coding Specialist (CCS).

#### **Certified proficiency in complex coding**

Our coding staff members are certified by organizations such as the American Academy of Professional Coders (AAPC) and American Health Information Management Association (AHIMA) and can provide coding for every major specialty, including those with complex coding requirements such as Radiology and Anesthesiology.

#### **Deeply-rooted experience**

For three decades, Conifer Health has helped providers accelerate their revenue cycle, optimize efficiencies and profitability with improved clinical documentation, greater code quality and accuracy. We provide clinical documentation improvement, coding services and support for physician practices, hospitals and academic medical centers within the United States. Our expertise includes:

- ProFee coding (multi-specialty) and Facility coding (inpatient/outpatient)
- Gap analysis, onsite education, RAC audits, coding and compliance audits
- Recognition as an AAPC CEU-approved vendor
