

CONIFER PAYER
OPERATIONS FOR
EMPLOYERS

Helping You:

- Get insight into the cost of claims versus health plan premiums
- Efficiently manage employee health benefits
- Administer plan enrollment and adjudicate claims
- Offer exceptional customer service for your self-insured plan
- Identify high-performing providers so networks can be refined

Advance your Self-Insured Employer Health Plan

Focusing on delivering quality care to employees, while managing the financial risk associated with the cost of care

YOUR BUSINESS CHALLENGE

Employers with self-funded health plans are looking for a better way to manage employee benefits—one that gives them insight into their claims data so they can truly understand the actual cost of care. If you can't easily identify how much you're paying in claims versus the cost of plan administration and premiums, you can't track the cost of care or implement effective cost-containment strategies.

WHAT WE OFFER

Conifer Payer Operations for Employers helps you manage your employees' benefits by offering comprehensive TPA services including enrollment, claims processing, and customer service, all while staying focused on your workforce satisfaction. You can leverage our automated self-service tools to quickly facilitate processes such as self-service enrollment, ID card printing, and claims status lookup. As an option, you can combine these services with our fully-integrated ConiferCore® suite of web-based applications. Through these web-based tools, you get access to comprehensive reporting to help you cost-effectively manage your employee population health, wellness initiatives, and self-insured benefits.

Conifer Health helps organizations transition from volume to value-based care, enhance the patient experience and improve quality, cost and access to healthcare.
